## 1954 INTRODUCTIONS by CLARENCE WHITE

Among Clarence White's introductions of this year are three that may well prove the most important oncocyclus breeders yet available. They combine fertility with immense size, height and strong onco pattern.

**BANDAR PASHA** (C. G. White)—This light and lovely flower is Mr. White's favorite child. It is starched and tailored in form, silvery lavender exotically and completely patterned with lines and stippling and a signal in brown madder. Very few plants exist and we recommend it only to those experienced growing these hybrids. **\$20.00**

**BEISAN AGA** (C. G. White)—This is the huge strongly marked wine and purple-black onco that visitors to Mr. White's garden fell in love with when it first flowered in 1952. Very few plants. Probably fertile. **\$20.00**

**BLACK JOPPA** (C. G. White)—As the name indicates this is a sultry version of Joppa Parrott done in dark slate and orchid grays and finely veined and stippled in a variety of rosy browns. It is finer and broader in form than Joppa Parrot and much more vigorous. It seeds more easily and has fertile pollen and should prove an excellent parent. **\$10.00**

**CHENIK AGA** (C. G. White)—This is the giant and wildly brilliant cream and golden orange bicolor or "Amoena" that visitors to Mr. White's garden have coveted since its flowering in 1952. I have been so heckled by those wanting this I am offering 4 plants for sale this season. Though not easy to grow, you who have experienced great success with oncos may want to try it. Probably fertile. **\$50.00**

**LABAN EFFENDI** (C. G. White)—This is an oncobred destined for popularity with gardeners and flower arrangers. It is very vigorous and easy to grow. A crisp lavender and purple bicolor with a hot black signal. The judges loved it and called it "Sugar Plum" but the name was not available. So prolific we introduce it at . . . **\$7.50**

**SIDI PASHA** (C. G. White)—This tailored oncobred of mustard yellow splashed pansy purple is exceptionally prolific and floriferous. It is strikingly curious. Vigorous. **\$10.00**

## 1954 INTRODUCTIONS by TOM CRAIG

### DAYLILY INTRODUCTIONS

**MALLOW** (Craig)—This big fluffy rose and rose beige bitone was especially liked by Mr. Lennington among our seedlings. It often has more than 50 buds to a stem. Its blooming season here starts in February, and it repeats in the fall. 40". Ev. **\$10.00**

**WIDEYED** (Craig)—This big yellow daylily has a wide dark portwine eye displaying the boldest contrast I've seen. Further it has one of the longest flowering seasons. The flowers are borne just above the evergreen foliage on erect unbranched scapes. **\$10.00**

**WONDER** (Craig)—A large full yellow daylily with a big light rose brown eye. Floriferous and long season of bloom. 30". Ev. **\$10.00**

### ONCOCYCLUS HYBRID IRIS

**FLAIRMORH** (Craig)—A beautifully formed little oncocyclus hybrid in two-toned greys. The cool color is deeper on the falls due to the lines radiating like the ribs of an open fan. (Puriss. x Jop. P.) x Cap. **\$10.00**

**L'AMOHR** (Craig)—For several years visitors have urged me to introduce this pink Lady Mohr seedling with a pronounced dark signal. I have kept it for breeding because of its novelty, fertility and obviously good pedigree for breeding novelties. Since it is attractive and there is nothing like it, I finally decided to accept the high branched stem and release it. (L. Mohr x Tangerine bearded seedl. pink.) **\$10.00**

## TOM CRAIG INTRODUCTIONS (Continued)

### TALL BEARDED IRIS

**APRIL SHOWERS** (Craig)—This tall ruffled yellow is a real novelty. The standards are a clear light yellow. The falls have a silvery quality and the sunlight yellow seems showered on the surface with greatest intensity on the margins, haft, and beards. (((Mari-  
posa Mia) x ((Tiff. x L.A.) x Belle Brunette))) x Joseph's Mantle.

**\$20.00**

**DARK CONTINENT** (Craig)—This big smooth dusky flower is made up of plum, copper and slate with a large violet blaze. It flowers and increases with great vigor. Molten x Grand Canyon.

**\$10.00**

**ETHEL SUMNER** (Craig)—A smooth shimmering lilac of unusual lightness and clarity that come as a surprise from our pink breeding. A clear self except for an accent of near white in the center of the falls. A connoisseur's flower because of its polish and elegance. ((Bl. Ox x Fl. Zenor) x Hall 42-07)) x Aahme.

**\$20.00**

**FIREBRIGHT** (Craig)—This smooth deep red is so rich and full of variety it is hard to describe. I have seen no deep red so colorful and intense. Further it is adorned with a dazzling cold blaze. Savage x Molten. Limited supply.

**\$25.00**

**GOLDEN TAN** (Craig)—This is the brightest iris I have seen in this color range. It seems to have every good quality—size, breadth, smoothness, clarity, and the plant is extremely floriferous. Limited supply. Good News x Molten.

**\$20.00**

**ONLY THIS** (Craig)—This is the huge tall clear orchid blend that judges have consistently chosen as an outstanding iris. It was Prof. Mitchell's first pick in my garden. He said, "If you bred 'ONLY THIS' iris your reputation would be made". This iris has one fault. It gives so much to its glorious display, little is left for increase. (H.C.) Prairie Sunset x Brilliant Amber.

**\$25.00**

**ORCHID AND FLAME** (Craig)—This orchid iris with the bright flame beard is unusually floriferous and full of increase. Not satisfied with its towering early splash of color, it flowers profusely again in late fall and winter. A striking garden mass. ((Hall 44-05) x (Mt. Wash. x Fl. Z.)) x (Mt. Wash. x Fantasy.)

**\$10.00**

**ZULU WARRIOR** (Craig)—Large ruffled yellow plicata with a dense wine-berry border. Exceptionally fine form and heavy substance. Twice-blooming. Limited supply. Joseph's Mantle x Burgundy Splash.

**\$20.00**

## 1954 INTRODUCTIONS by SANFORD BABSON

Sanford Babson has been breeding iris on a large scale for the past 6 years. At the 1953 Hollywood show his seedlings were first shown and so much admired he registered these three favorites.

**FIGURINE** (Babson)—The perfectly formed flowers of buff tinted lavender with a slightly deeper lavender wash are well displayed on 38 inch stems with fine spacing.

**\$10.00**

**NELL BABSON** (Babson)—This big ruffled, orchid-pink, with bright tangerine beard has extremely heavy substance derived from its seed parent Orchid Lady. The pollen parent, Hall 45-39, has given delicate lacy margins to stands and falls. A profuse twice-bloomer.

**\$10.00**

**YUCCA** (Babson)—The outstanding quality of this iris is its elegant flaring form. A smooth light yellow self except for near white accent in the center of the beard. Has all good qualities.

**\$10.00**

## BEARDED IRIS

As you have seen from earlier catalogs, and can see again in this one, we grow a tremendous assortment of iris. Almost every variety of note, both old and new, appears here, representing breeders all over the country and several from abroad. But our catalog is not only a complete one, it is an exciting one for the gardener who wants to get a lot for his money. We have always offered good collections, but this year they are well worth your study. Look them over closely—you'll be surprised and pleased at what you can get. Collections appear on pages 14 through 21.

# CRAIG'S BREEDING COLLECTION

With pedigree: 5 for \$4.75; 10 for \$9.00

ONCOBREDS, MOHR HYBRIDS, TANGERINE BEARDED PINKS, HOT REDS, PLICATA FANCIES, etc. With Mr. White we have, in these selected seedlings, the best oncobred and Mohr hybrids in existence. Our selected tangerine bearded pinks are tops. Our plicatas display unbelievable quality and variety. Special emphasis has been placed in securing fine reds, and also in selecting for types that bloom twice a year.

From countless thousands of different seedlings we have selected only dozens. All but a few of these top selected seedlings will go into this breeding collection. We can't introduce them all.

These seedlings will be sent with pedigree attached. Only beautiful and high quality flowers reach this advanced stage of selection, so you will have lovely things for your own, exclusive clons. State your special interest with order. For seedlings **without pedigree, deduct 25%**. No more than two collections to a customer.
